

« UNICHIP

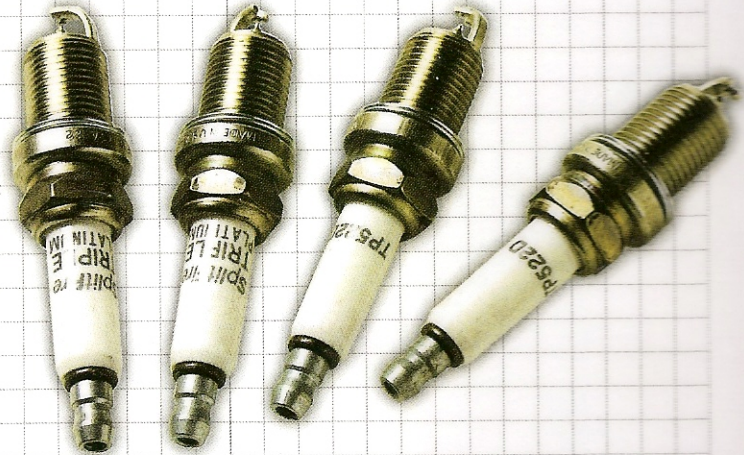

The UNICHIP is a fully programmable 'piggyback' ECU which channels over 53,000 optimised fuel and ignition parameters through a car's ECU to deliver maximum power and improved fuel economy. In addition, your engine will be smoother, more responsive, and get maximum fuel efficiency. If your engine is modified, the UNICHIP will provide help to realise the full performance potential of the modifications. A properly tuned UNICHIP can result in power and torque gains of 5 – 9% in standard cars and up to 25% in turbocharged cars, or modified cars. Compatible with OBD1 and OBD2 cars.

SPLITFIRE TRIPLE PLATINUM SPARK PLUG »

This high-performing spark plug combines SplitFire's patented "V" electrode design with 3 separate points of platinum and a fine-wire centre electrode so as to provide the strongest and longest spark possible. It also requires less voltage to fire, and optimises the exposure of the flame kernel to the air/fuel mixture. Available for a wide range of makes and models of cars.
